

Dear Jobs and Skills Australia

We note the Discussion Paper for the Clean Energy Workforce Capability Study and thank you for the opportunity to participate. We note the paper includes the desire to work with all Jobs and Skills Councils on this study. We are happy to assist as required.

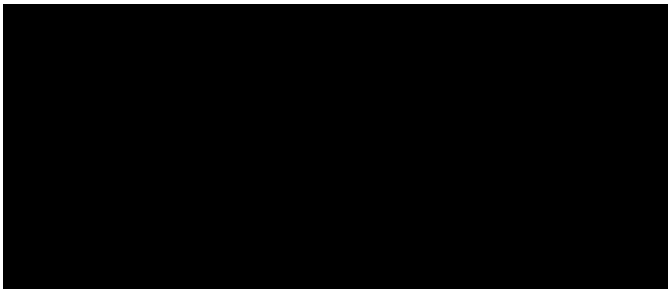

We were pleased to put in a submission about the terms of reference to this study earlier this year.

The definition of the Clean Energy workforce for this study seems appropriate given the needs of the industry, and we note that the occupations and job roles covered by the study are outside of the coverage of Skills Insight Jobs and Skills Council.

We are associated with a number of related occupations that work in agriculture, forestry, ecosystem management, carbon farming and capture, and similar roles. If you need us to provide information relating to the intersection of the coverage of the study and the occupations we cover, we will be happy to assist.

In the meantime, we wish you all the best with your work.

Regards
