This **Labour Market Data Dashboard** provides select key indicators for the labour market by Employment Region and is updated monthly with available data. For this Employment Region, given the relevant SA4 can only provide a poor proxy, ABS Labour Force data have been replaced with JSA Small Area Labour Markets quarterly smoothed estimates (labour force, unemployment and the unemployment rate) and 2021 ABS Census data (largest employing industries), for a more geographically representative fit.

Data are not readily available by Employment Region. Given the relevant SA4 can only provide a poor proxy for this Employment Region, SALM SA2 data have been used for select labour market indicators (labour force, unemployment and the unemployment rate) and ABS 2021 Census data for the largest employing industries, in lieu of ABS Labour Force data. For Employment Regions with multiple SA2s, aggregated SALM labour force and unemployment estimates have been used to derive unemployment rates for this Employment Region. The Internet Vacancy Index (IVI) and income support data are apportioned to Employment Regions using an SA2 based concordance. *Job seeker payments include those who are in receipt of either JobSeeker (aged 22 and over but under the Age Pension qualifying age) or Youth Allowance (other) payments (those aged 16 to 21). The reporting population for income support payments has changed to include those who are suspended from payment, and those who are current but on zero rate of payment for JobSeeker payments and those who are suspended from payment for Youth Allowance. Note that not everyone in receipt of income support is on the caseload. Data are published on data.gov.au. **Estimated Resident Population estimates are only available by standard 5-year age groups.
