

Caveats

The Data on Occupation Mobility (DOM) are created using administrative data on individuals' Income Tax Returns (ITR) within the Skills Tracker Person Level Integrated Data Asset (PLIDA) project in the Australian Bureau of Statistics (ABS) DataLab. As such, the data are subject to the ABS data clearance rules. To avoid identification of specific individuals, occupation transitions with fewer than 10 individuals are not included.

In addition

1. The reported occupations from ITR assumed that the individuals have assigned their correct occupations and that the ATO's classification in ANZSCO v1.3 reflects the individuals' assignment.
2. Due to meeting the ABS identification requirement, the total counts may not equal the total number across all occupations in that year.

3. Contractors have different tax obligations to employees and do not appear in the ITR data set. There is a potential bias resulting from this (i.e., some occupations may have higher percentage of people who are sole traders or self-employed and this may impact the results).
4. Those identified by ATO as 'consultants' working in occupation are mapped to the corresponding ANZSCO v1.3 occupation.
5. Not all ATO occupation codes can be mapped to ANZSCO v1.3 occupation.
