Note: Data are not readily available by Employment Region. ABS modelled estimates are based on the Darwin SA4. While this is the best fit available, it is only a fair proxy for the Employment Region so caution should be used interpreting results. The Internet Vacancy Index (IVI) and income support data are apportioned to Employment Regions using an SA2 based concordance. \*Job seeker payments include those who are in receipt of either JobSeeker (aged 22 and over but under the Age Pension qualifying age) or Youth Allowance (other) payments (those aged 16 to 21). The reporting population for income support payments has changed to include those who are suspended from payment, and those who are current but on zero rate of payment for JobSeeker payments and those who are suspended from payment for Youth Allowance. Note that not everyone in receipt of income support is on the caseload. DSS data for Alice Springs has been included for the Darwin ER. Data are published on [data.gov.au](https://data.gov.au). \*\*Estimated Resident Population estimates are only available by standard 5 year age groups. For more information about the data in this dashboard, refer to the Employment Region Labour Market Dashboard data sources and quality document on [jobsandskills.gov.au](https://jobsandskills.gov.au). #Given the volatility of the underlying data, industry employment proportions should be treated with a high degree of caution, particularly change over the year figures.
