Employment Region Dashboards and Profiles

Jobs and Skills Australia produces a range of dashboards and profiles that bring together labour market information for all 51 Employment Regions across Australia. Employment Regions are the key geographic areas used for the delivery of Workforce Australia employment services across Australia.

Monthly Labour Market Dashboards

The monthly Labour Market Dashboards combine a range of data sources from Jobs and Skills Australia, Department of Social Services (DSS) and Australian Bureau of Statistics (ABS) at the national, state and territory level, and for all 51 Employment Regions. Dashboards include:

- key labour market indicators
- 5-year employment time series
- 5-year unemployment rate (%) time series
- largest employing industries in a region
- Department of Social Services job seeker income support payments
- Local Government Area unemployment rates
- number of internet job advertisements
- occupations in demand in a region.

Recruitment Trends and Employers Needs Profiles

The Recruitment Trends and Employers Needs Profiles provide an update on recruitment activity at the state and territory level, and for all 51 Employment Regions.

Profiles include:

- trends in the Internet Vacancy Index
- top 10 advertised jobs
- job ads by skill level breakdown
- data from the Recruitment Experiences and Outlook Survey:
    - proportion of employers recruiting
    - difficulty in recruiting
    - reasons for recruitment (new positions or to replace staff)
    - staffing outlook
    - methods employers used to advertise their positions.

Industry Profiles

The Industry Profiles explore employment trends at the national, state and territory, and Employment Region level. Profiles also examine gender and age distribution of the workforce for each region.

Profiles include:

- number of people employed
- largest employing industries in the region
- time series growth trends over 1 year, 5 years and 10 years
- a look at youth and mature workers in different industries in the region
- gender split for the industries in the region.
